SUBJECT: Southern California Edison, Mira Loma Substation, ID# 51003
Title V de-minimis significant revision, Non-RECLAIM, Proposed Change of
Conditions

Dear Mr. Rios:

The South Coast Air Quality Management District (AQMD) has received and reviewed de minimis significant Title V revision applications from Southern California Edison, Mira Loma Substation, located at 13568 Milliken Avenue, Ontario 91761, for a proposed change of conditions involving the gas turbine and the emergency diesel engines. The proposal is to increase the annual allowable emission limits and fuel use for the turbine while decreasing the allowable annual operating hours for the emergency engines.

The AQMD has evaluated these applications and made a preliminary determination that the equipment will be operated in compliance with all of the applicable requirements of our rules and regulations.

The AQMD is required under Rule 3005 (e) to provide a copy of the proposed permit to the EPA Administrator for a 45-day review. As such, a copy of the proposed revision to the existing Title V permit is attached along with our engineering analysis for your review. We intend to issue the final permit at the end of EPA's 45-day review period, pending any comments we receive.

If you wish to provide comments or have any questions regarding this project, please contact Mr. Chris Perri at (909) 396-2696/ cperri@aqmd.gov or Mr. John Yee at (909)396-2531/ jyee@aqmd.gov.

Sincerely,

A handwritten signature in cursive script that reads "Michael D. Mills".
